

Enrich Your Benefits with Savings

Pinpoint Health Benefits
Makes It Possible

The trend with healthcare benefits is clear: prices going up, quality and transparency going down. That changes with Pinpoint Health Benefits.

With our customizable health plans, employers experience 10–15% savings, access to world-class providers, and low or no deductible or coinsurance for members.

**10–15% Savings
on Your Health
Plans with Pinpoint**

What Can You Do with Your Savings?

Consider setting up a **Health Reimbursement Arrangement (HRA)** for your employees to enrich and differentiate your benefits. An HRA is a tax-advantaged health benefit account that you fund on your employees' behalf.

You can elect how much to contribute and employees can use the funds towards qualified medical expenses that you, their employer, customize. This provides additional support to your team members that can be used according to their unique health needs.

Employees Can Get Reimbursed by the HRA for Things Like:

-  Doctor Visits
-  Lab Tests
-  Medications
-  Hospital Stays
-  More

More Savings Means Better Benefits

Stop looking at your benefits through the lens of limitations. Pinpoint reframes the discussion from "how can we afford good benefits?" to "where will these savings take us?"
